

BF-3 Linear Vibratory Feeder

Introducing SINGLE DRIVE Solutions

Engineering that moves . . .

The Syntron BF-3 feeder is an exciting new addition to Riley Automation's existing line of products, offering a single drive solution for larger trough sizes.

The BF-3 utilises a sealed, sanitary design capable of handling a diverse range of feeding applications while providing solutions for industries such as food, pharmaceutical, material handling and packaging.

System Benefits:

- Designed for high speed feeding
- Sanitary design eliminates contamination during washdown
- Feeder capable of operating at 1.9 mm stroke with a trough carrying weight ranging from 9 to 18 kilos
- Other trough sizes available - contact our offices for assistance
- Externally adjustable tuning
- Drive design is IP 66 compliant
- CE certified

A name you can trust

For over 50 years, Riley Automation has combined engineering excellence with innovation technology to deliver tailor-made solutions for materials handling.

Riley Automation's solutions are fast, efficient and reliable. That's why you'll find our machines keeping products on the move in just about every type of manufacturing and process industry.
