

Counters & Baggers

Engineering that moves...

Riley Automation has a reputation for the high quality design and build of product counting and bagging systems.

Our solutions include dedicated systems for single products through to multi-station operations capable of feeding, counting and dispensing an ever-changing range of items.

Units are precision-manufactured using CAD and laser cutting to ensure high quality and long life. They are also ideal for retro-fitting to existing systems.

System Benefits:

- Accuracy of count
- Rapid product change
- Programmable settings
- Rapid/high speed count rate
- Adjustable to suit many components.

A name you can trust

Riley Automation's solutions are the fast, efficient and reliable choice that keeps products on the move in just about every type of manufacturing and process industry.
