

## F-T02 Linear Vibratory Feeder

### Engineering that moves . . .

Riley Automation offers a comprehensive range of robust, linear vibratory feeders combining flexibility with high performance. The most recent addition to our product range is the F-T02 drive unit.

The new F-T02 is designed for high speed feeding of materials including hard to handle products. Troughs are manufactured in-house and drive units specified to suit individual client requirements.

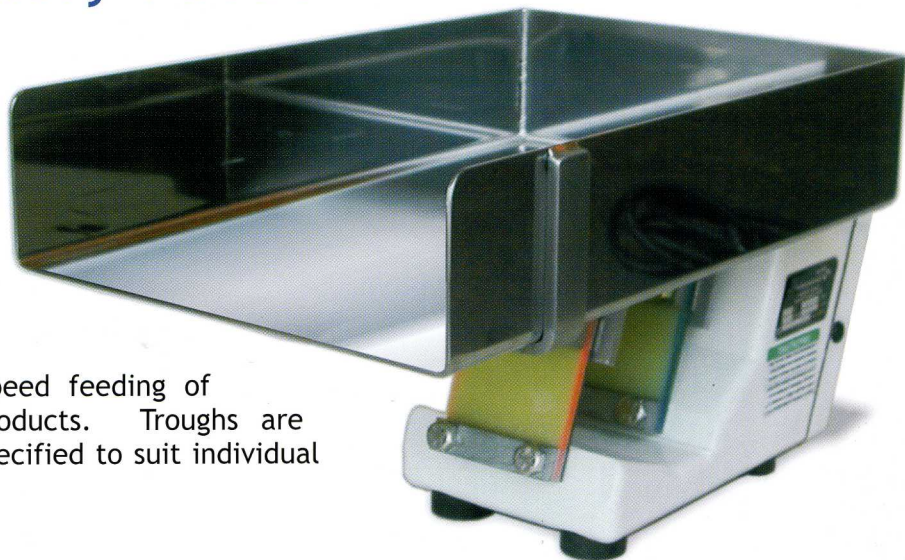

### System Benefits:

- High stroke up to 2.25 mm
- Delivers increased capacity with minimum stroke variation under load
- Maintains high stroke and travel speed when subject to significant headload
- Incorporates an externally adjustable air gap
- Has a maximum capacity of 10 T/Hr dependent on material
- Low maintenance
- Robust and reliable
- Dustproof and sealed for washdown
- Can be fitted with rubber isolators or coil springs.

### A name you can trust

For over 50 years, Riley Automation has combined engineering excellence with innovation technology to deliver tailor-made solutions for materials handling.

Riley Automation's solutions are fast, efficient and reliable. That's why you'll find our machines keeping products on the move in just about every type of manufacturing and process industry.
