

## Pillow packs, pouches and sachets

*a unique solution from Riley Automation.*

### Engineering that moves . . .

Established for over 50 years, Riley Automation combines engineering excellence with innovative technology to deliver tailor-made solutions for materials handling.

### System Benefits:

- High speed, maximum throughput
- Packs presented randomly, end-to-end
- Capability to "condition" distorted packs
- Robust stainless steel construction, fully seal-welded
- Proven electromechanical drive giving:
  - Variable output rates, amplitude and frequency
  - Quiet operation
  - Low maintenance
- Optimised for handling/presentation of packets, pouches and sachets.

### A name you can trust

Riley Automation's solutions are fast, efficient and reliable. That's why you'll find our machines keeping products on the move in just about every type of manufacturing and process industry.
